Ms. Ellen Mattlin
U.S. Department of Energy
P.O. Box 550, MSIN A5-15
Richland, WA 99352

Dear Ms. Mattlin:

Re: Close-out of the Notice of Deficiencies for the 105-DR Large Sodium Fire Facility Closure Plan

Ecology has reviewed the latest version of the 105-DR Large Sodium Fire Facility Closure Plan, Revision 1A (Plan). All of Ecology's previous comments have been incorporated into the document. We have also reviewed anticipated changes to the Plan pursuant to Revision 2, and find them acceptable. Therefore, we believe Revision 2 should be completed as agreed. If all of the changes reviewed, to date, are incorporated into Revision 2 of the Plan, we will consider the Plan to be complete and ready for public review.

We have also reviewed the draft 105-DR Large Sodium Fire Facility Decontamination, Sampling, and Analysis Plan, WHC-SD-EN-AP-186, Rev. 0. This document is also acceptable to us for use during the decontamination and sampling activities at 105-DR.

Formal approval of the 105-DR Large Sodium Fire Facility Closure Plan will not occur until after the public review cycle and permit modification process.

If you have questions regarding the completeness of the Plan or the Permit modification process, please contact me at (360) 407-7146.

Sincerely,

A handwritten signature in cursive script, reading "Scott E. McKinney".

Scott E. McKinney
